

## **Power Ahead Colorado Cold-Climate Air-Source Heat Pump Rebate**

### **Save hundreds when you upgrade to an energy-efficient heat pump**

Heat pumps provide both heating and cooling while using less energy than conventional heating and cooling systems. They're a greener, healthier choice, too.

Now, you can save \$1500 when you put energy-efficient heat pump technology to work in your home. Our money-saving rebates offer an easy preapproval process and may be combined with other rebates available through your utility or local government—helping you save even more on your upgrade.

### **We've made it simple to save on a new heat pump.**

#### **Hire a contractor**

Be sure to select a verified Power Ahead Colorado contractor. Our searchable [Contractor Finder](#) takes the guesswork out of locating the right partner for your project.

#### **Get preapproved**

Have your contractor submit the project to Power Ahead Colorado for review. Our team will reach out to verify the details and confirm your eligibility and rebate amount.

#### **Schedule the installation**

Once your contractor completes the upgrade, you can start enjoying improved comfort and efficiency right away.

#### **Get paid**

With the project complete, your contractor will submit the final required documentation to Power Ahead Colorado. We'll ask you to review the project details and confirm whether the rebate should be issued to you or your contractor.

## Qualifying equipment

To qualify, equipment must be purchased and installed on or after June 29, 2026, and appear on our Qualified Products List or meet program efficiency requirements.

## Eligibility requirements

### Projects must:

- ☐ Be in a municipality or county that [participates](#) in DRCOG
- ☐ Be a retrofit project in an existing building—new construction is ineligible
- ☐ Fall within one of the following property types:
  - Single-family homes
  - Multi-family buildings
  - Commercial buildings
- ☐ Be completed by an approved contractor displaying a Power Ahead Colorado badge on the [Contractor Finder](#)
- ☐ Be submitted by the contractor to Power Ahead Colorado before work begins

## Coming soon: more ways to save

While our program's initial phase focuses on cold-climate air-source heat pumps installed in existing buildings throughout the DRCOG service area, future phases will expand incentives. Stay tuned for opportunities to save on other types of heat pumps, heat pump water heaters—even custom rebates for commercial and multifamily projects.
